

2 Days sinus grafting course

(Sub crestal as well as lateral approach)

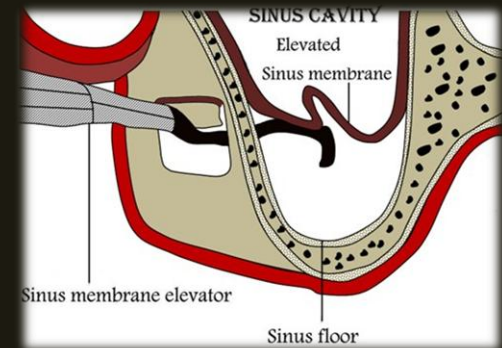

We don't teach
But make you
Understand **dental implants**

Course highlights

1. Detailed audio- visual presentations.
2. Live sinus lifting and grafting surgery
3. Limited attendance in course to enable personal attention.
4. Participants will practice to perform all the steps of sinus elevation on dummies.
5. Full clinical support from faculty for your future sinus grafting cases.
6. Affordable fee structure.
7. Different kind of conventional to recent sinus lifting techniques will be discussed in the course.
8. Most preferred venue in north India- you get chance to visit beautiful Taj.
9. Study material and multiple surgery videos of the sinus grafting are given after the course

Course details- (What is taught)

1. Limitations With posterior maxilla
2. Guidelines for successful implant therapy in posterior maxilla
3. History of sinus grafting procedure
4. Maxillary Sinus Anatomy
5. Indications for sinus grafting
6. Contraindications for sinus grafting
7. CT planning of cases with advanced implant planning software
8. Pre and post medication for sinus graft procedure
9. Conventional Surgical Techniques
10. Lateral Window approach
11. Armamentariums required to perform sinus grafting
12. Step by step presentation of conventional lateral window approach
13. Decision making of Simultaneous or delayed implant placement
14. Graft materials used for the sinus grafting
15. Newer modified sinus lift techniques for the lateral approach
16. Lateral Sinus lift technique using piezo surgery unit
17. Lateral approach for sinus grafting using DASK
18. Disadvantages of lateral approach
19. Crestal (Osteotome) approach/internal sinus lift technique
20. Step by step presentation of conventional crestal approach
21. Advantages and disadvantages of the crestal Osteotome technique
22. Newer modified advanced sinus lift techniques for the crestal approach
23. Bicortical engagement without sinus grafting
24. Sinus lifting with crestal approach using DASK
25. Ballooning technique
26. Hydraulic sinus lift technique
27. Intra lift technique
28. Complications associated with sinus graft surgery and their managements

What the participants will be able to do after this training-

1. Motivating the patients for sinus grafting procedures
2. Diagnosis and treatment planning of the sinus lifting cases
3. Decision making of appropriate sinus grafting technique in a particular case
4. Successfully performing the lateral as well as crestal approaches in their practice
5. Choosing the appropriate graft material for the particular sinus lifting case
6. Successfully Harvesting autogenous bone and using it for sinus grafting
7. Different Ways of minimizing the cost of the sinus grafting procedure in the practice
8. How to market the procedure the implant patients
9. How to minimize the post operative complications
10. Management of any complication

Course mentor-

Dr. Ajay Vikram Singh BDS, PG. Cert. Dental implant, DICOI

Dr. Ajay Vikram Singh after graduating from Luck now (India) completed one year P.G. certificate Program in dental implants from India. He then received training for advanced bone and soft tissue grafting procedures in implant dentistry from Miami, USA and also learned many other advanced implant procedures in different continuing education programs in USA. Dr. Ajay is a well known Implantologist, key note speaker and mentor at the international level. He has trained more than 500 national and international dentists in last few years at his center and during different workshops over the basic to advanced implant procedures.

Dr. Ajay is an active committee member of different prestigious national and international associations' like- Academy of oral implantology (AOI),

Indian academy of osseointegration (IAO),

Indian academy of aesthetic and cosmetic dentistry (IAACD).

What few previous participants say about our implant training courses?

I was really over-conscious when joined Dr. Ajay's implant course coming all the way from Libya and had no knowledge about the implants. But I am really thankful to dr ajay and dr sunita, as after joining their implant course, now I am placing implants in my clinic and using multiple systems. Dr Ajay is really a talented guy and good teacher too.

Dr. Ahmed Ameen, Libya Email:

Dr. Ajay's implant training courses are really good, I learned a lot about the dental implants and would recommend every dentist to join Dr. Ajay to learn the dental implantology.

Dr. Naboya Maria Nigeria Email: a2zdent@yahoo.co.uk

I would like to thank Dr. Ajay and Dr. Sunita for your teaching and your help to make me learn implants. Dr. Ajay is really a very Good teacher and also a talented person. During my course I was feeling as I am in my clinic and with my family therefore I learned Implant in a very easy way.

Dr. Bashar A. Salman, Bagdad (Iraq) MAIL- Contact no. +964790611

bashar_asm@yahoo.com

I am very grateful for dr ajay to make me learn all the important things about implantology. From the first day of the course I feel lucky to be one of the participants. Dr. Ajay and Dr. Sunita both have simple personalities so Participant feels very comfortable. I got new friends. I travel a long way from my country to India but now I feel it was worth.

Dr. Bassam Rehab, Oman Mail- Contact no. 0096892485861

bassam_rehab@yahoo.com

I am a pedodontist in Kenya and accidently discovered this course via internet. I was really apprehensive at first about the authenticity of this course. I registered for the 9 days course, booked a flight to India to learn implants from Dr. Ajay but after my training I am very glad for I made a right decision. Dr. Ajay is a very talented teacher as he simplifies all the technical jargon to the point any novice will understand. The one on one training that I received ensured that I could ask all the 'silly' questions and yet get back a brilliant answer. The ambience of his center is very conducive to learning implants you will practically get to witness all the stages of implantology from the planning stage with CT software up to the delivery phase. I was allowed to see many implant insertion and prosthetic procedures and also to insert implant in patient's mouth under his guidance. Now just after 9 days training I feel very confident to use any implant system at my center. I have no hesitations recommending dr. ajay to any dentist worldwide for the implant training.

Dr. Humphrey M. Muriithi (Nairobi, Kenya) Mail- muriithih@yahoo.com Contact no. - +254 722 288891

I had no knowledge about the implants before I joined their course but after joining this course now I am successfully placing implants in my own clinic. The best part of this course is very friendly behavior of dr ajay and dr sunita so the participants feel very comfortable to discuss their queries. Dr ajay remain very supportive for the planning of your own cases in your clinic after the course so you feel very comfortable in your implant practice if your teacher is above you to help any implant procedure at last I could find a best implant teacher and suggest every dentists to go and learn implants from Dr. Ajay.

Dr. Rohit Sharma, himachal Pradesh Email- healintouch@rediffmail.com Contact no 094184744

Excellent implant surgeon and mentor. Being an oral surgeon I expressed my wish to learn only the prosthetic part of the Implantology as I thought placing the implant is not a big thing for a oral surgeon but after joining this course I came to the point that the implantology is completely a different science and every oral surgeon should take the training for placing implants and many associated GTR procedures before start practicing the implantology to minimize the failures. I am very thankful to Dr. Ajay as his training was really an eye opening experience for me. Now I am successfully placing implants at my practice and still discuss my cases with Dr. Ajay to minimize the failures. He is very cooperative and generous guy.

Dr. Vinayak Karun, Maxillofacial surgeon, mail- vinayakkarun@yahoo.com, phone- 097526-50505

I had known Dr. Ajay from the time of my dental graduation as he was my two year senior in the dental College. I am really amazed to see the hard work he has done to reach at this level. He is very brilliant, technically Sound, ultimate mentor, and very good human being. I am very successfully practicing implantology at my center after his course and he is still continue helping me for my cases planning and overcome the apprehensions. Many Thanks to Dr. Ajay for all I am doing in implant practice. I am practicing in a very small city, where Patients were not very used to get the expensive treatments done but I have established a successful implant Practice because of the guidelines I learned during this training. I recommend all the dentists to join his training who really Want to successfully practice the implantology.

Dr. Chandan Bhatnagar, General dentist, mail- chandan8125@gmail.com , phone- 09458880111

Dr. Ajay has broken all the apprehensions for placing implants I had, before joining his course. Dr. Ajay is really very talented and opens the entire door to make you learn the implants. Very cooperative and generous Guy, appreciate all of even our silly questions and answers them all. I would like to recommend very dentist to go to his center to learn the real clinical implantology.

Dr. Andrew Murphy, General dentist, Ireland, mail-

I have been practicing dentistry for over 17 years and I developed interest in the Implant practice at the time of my post Graduation but never had the opportunity to be well trained to start implant practice. During my training at Dr. Ajay's center I documented proceedings of each day; there was no single day that we did not carry out implant procedures at one stage to the other covering all the stages of the implant from treatment planning to the delivery of the prosthesis using different implant Systems and prosthetic options. I have learnt a lot which is highly important for me to start and establish the implant practice. What more, I would like to appreciate Dr. Ajay and his wife Dr. Sunita for their kindness and warm reception from day one to the end. Special appreciation for the last day of my training, which happened to be my birthday which I just mentioned towards the close of the day and before you know it, in less than 2 hrs, they have already, organized a birthday celebration where I cut birthday celebration cake as if I was really with my family. Indeed it was home away from home. Thank you and god bless you.

. Ajayi Joachim O, restorative dentist, Nigeria,

Dr. Ajay taught the dental implants in detail and made it quite easy to learn this advanced technique. He has the best infrastructure, equipments and audiovisuals to teach dental implants. The best part of this course is that it's not a particular implant system based course but we learn multiple implant systems during this course so that we can choose any of the system according to our patients to start the implants practice.

Dr. Neha Bhandari Rao, (Oral and maxillofacial surgeon), Saudi Arabia mail- drnehabhandarirao@gmail.com
